

Prepare the hoof:

Thoroughly clean hoof with a hoof pick.

Putting on the boot:

1-2. Open the front shield cap by twisting 90 degrees counter-clockwise. Remove the shield cap. Pull the dial on the Boa Lacing System™ away from the boot until you feel it release. Spread the boot open with your hands.

3-4. Slip the Boa Horse Boot™ over the hoof, making sure the toe of the hoof is as far forward as possible and the boot is started on straight. If needed, you can use the pull loop on the back of the boot to help secure the boot into place. Place horse's hoof on the ground to set the heel.

Tighten the Boa Lacing System:

5-6. Push the dial down until you feel it lock and begin tightening by turning CLOCKWISE. The boot will begin to tighten and close around the hoof and hairline. Continue to tighten until a finger can be snugly slipped between the collar of the Boa Horse Boot and the hairline. **DO NOT OVERTIGHTEN.**

7. Place the shield cap firmly over the dial so that "Boa" is up and down (vertical). Twist it 90 degrees so that the "Boa" is now horizontal. You should hear six "clicks" if it is fastened properly. Do not use the boot without the cap. Replacement caps are available.

A properly applied boot:

8. A properly applied Boa Horse Boot will be snug, but you should be able to fit a finger between the collar of the boot and the hairline.

Important: After you fit the Boa Horse Boot and the horse has had a chance to move around, tighten the Boa dial an additional ¼ turn. Make sure the boots are still fitted squarely and securely on the hoof. Make sure the Boa Horse Boot has not twisted to the side. If the boot has twisted to the side, it is either too large or needs to be tightened. Discontinue use if the boot continues to twist. Boots that twist can cause damage to the hoof and soft tissue areas.

Caring for your Boa Horse Boots™

Properly cared for, a pair of Boa Horse Boots will last for years. In general, to care for your boots, there are three steps to follow: cleaning, drying, and conditioning.

- 1. Cleaning:** On a regular basis, brush away surface dirt with a soft brush. After extended, rugged use, wash with mild soap and warm water. Be sure to pay special attention to the dial area. The accumulation of sand or mud inside the gear can cause cable release problems. Be sure to rinse all soap off before drying.
- 2. Drying:** Open boot fully, dry at room temperature. Never expose to heat!
- 3. Conditioning:** Recommended treatment for top grain leather: NikWax® Paste Wax. Information on NikWax® Paste Wax can be found at www.nikwax-usa.com.

Important: Although the Boa Gaiter will protect the soft tissue areas from chafing in sandy or muddy conditions, it is important to empty sand or mud during extended use. Empty the Boa Horse Boots as you would empty your own running shoes after deep mud or sand.

Removing the boot:

1. Open the shield cap by twisting counter-clockwise 90 degrees.
2. Pull the dial on the Boa Lacing System™ away from the hoof until you feel it release.
3. Spread the boot away from the hoof and remove.

Important: Always turn the gear dial CLOCKWISE! Forcing the dial in a counter-clockwise direction will destroy the gear mechanism.

The Boa Gaiter

The Boa Gaiter is recommended for sandy or muddy conditions. It helps keep excessive sand and dirt out of the Boa Horse Boot™. It can also be used on horses with thin skin who have a tendency to chafe.

Fitting the Boa Gaiter

1. Fold the hoof plate to a 90° angle, towards the inside of the Gaiter.
- 2-3. Insert the Gaiter into the Boa Horse Boot prior to booting the horse. Press the hoof plate down snugly onto the sole of the boot.
- 4-6. Fold the neoprene "upper" cuff down over the outside back of the boot, and slip the boot onto the hoof, holding the Gaiter in place with one hand. Let the horse stand down, resting the hoof flat on the ground.
- 7-8. Fasten the Gaiter snugly around the pastern (over the top tab of the attached cushion, if it is being used - see information below).

The Gaiter Front Cushion

- Wrap the locking fabric "loop" side of the Gaiter forward, around the front of the pastern.
- Press the "hook" side of the fabric cushion tab onto the Gaiter "loop." Note that the cushion's locking tab should be at the top, with the wide end of the Cushion at the bottom.
- Once attached, the cushion should be aligned down the middle of the front of the hoof, so it will be behind the dial area of the boot.

EasyCare Inc. Warranty

Online Warranty Registration:
easycareinc.com/warranty_reg.aspx

EasyCare offers a 90 day repair or replacement warranty for all hoof boots (purchased as new) manufactured under the EasyCare label. Please register your product at http://www.easycareinc.com/warranty_reg.aspx and keep your original dated receipt(s) as proof of purchase during the warranty period.

If a boot fails during warranty, it is generally a minor hardware issue. Please bear in mind that most components of EasyCare hoof boots are either replaceable or repairable. This includes wire laces, cables, buckles, gears, rollers, screws and straps. Most repairs can be easily accomplished with simple household tools. Depending on the circumstances, EasyCare will send you repair parts, or ask that you return the boots to us for evaluation. Videos of many repairs are available on our website at www.easycareinc.com.

While this warranty is very broad in nature, it does not cover wear (including sole breakthrough when worn over horseshoes), misuse, abuse, factory seconds, bargain bin items, or boots purchased as used. Products returned for evaluation must be clean, dry and free of debris, dirt, sand and manure. *Failure to return clean products will result in product being shipped back at sender's expense or a cleaning fee may be assessed.* Damage inflicted by omnivorous horses, rodents or other unusual abuse is not covered.

Returns must be authorized before sending and must be returned with an RMA number. Contact EasyCare directly for all warranty issues at 1-800-447-8836 to receive an RMA number.

Specifically:

1. Returns for credit only (refund of purchase price only): Products must be in new, unused condition, free of dirt and wear marks. It is your responsibility to evaluate the fit of your new product in a manner where you may return it in new condition if you have doubts about the fit. Be certain that you know the return policy of product purchased from dealers other than direct from EasyCare (the manufacturer). EasyCare will not give credit for product purchased elsewhere. Return to point of purchase in that circumstance. Also, all brochures, inserts and/or free gifts must accompany returned items.

2. Exchanges of new product (size or color issue): EasyCare will only exchange NEW items with same product style and model for same product when requested with NEW items only. You may exchange for a different size or color exchange only, no exceptions. If you wish to have a different style of hoof boot, etc., you must return new item for refund (original point of purchase) and then purchase new choice.

3. Warranty failure (used product that is within 90 days of purchase): Contact us at 800-447-8836. EasyCare will either provide repair parts directly to you, or repair/replace after our evaluation. Items must be returned to EasyCare at the consumers cost with original receipt. EasyCare will return the items via ground service (UPS or FEDX) free of charge. Requests for faster shipping service will be at the expense of the consumer.

4. Not under warranty (over 90 days or no proof of purchase): Repair parts may be purchased from your local dealer or EasyCare, or product may be returned for evaluation and possible repair (parts, labor and freight charges will apply).

5. Call for an RMA number (under warranty or not): Returns must be authorized before sending and must be returned with an RMA number clearly written on outside of packaging. Contact us at 800-447-8836 to receive an RMA number. Returns will be refused without an RMA number on outside of package.

6. Freight charges (outside warranty period): Freight charges to and from EasyCare for repairs, exchanges and items outside the warranty period will be the purchaser's responsibility.

7. EasyCare staff is always willing to discuss any specific issues you may have regarding the performance of your EasyCare or Old Mac's products. Please contact us at 800-447-8836 or email to admin@easycareinc.com. Visit our website, easycareinc.com, for tips and product information that will help with the use of any of our product line.
